# Environmental Restoration

Report for Fiscal Years 2000 – 2004  
March 2000

# SMART Cleanup

For Future Generations

# Foreword

The Department of the Navy has the responsibility to defend the freedom of the seas and protect the people of the United States. An integral part of that responsibility is the protection of the environment in which we live. In the course of conducting Navy and Marine Corps operations, it is crucial to minimize new impacts on the environment and restore areas that have been damaged by past operations. This philosophy, along with improved environmental training and new, forward-thinking business practices, has helped us to make impressive strides toward our cleanup goals. SMART Cleanup is the articulation and strategy of this strong commitment to preserving our world for future generations.

The Five-Year Plan documents the progress of the Navy's environmental cleanup program. The first four chapters of this year's report encapsulate the program's history and highlight accomplishments over the past year, including recent cleanup projects, new technologies, and the people, programs and partnerships that made those efforts happen. Chapter 5 provides data summaries for each installation in a concise, quick-reference format.

As the Navy moves steadily toward our goal of cleaning up all sites by 2014, we appreciate and encourage your interest in our ongoing environmental cleanup programs. It is our hope that this plan will prove useful and inspirational to installation personnel, regulators and the public.

# Comments

The Department of the Navy (DON) recognizes that cleaning up the nation’s past hazardous waste disposal sites will impact many different segments of the Navy and Marine Corps, from the Remedial Project Managers (RPMs) working on installation investigations and remediations to the research laboratories developing new technologies to assist in the cleanup. We encourage your comments on the plan. Please fax or mail your comments to the address below, submitting as many pages as necessary. Our goal is to make this plan user friendly and responsive to your needs. Your input is greatly appreciated.

Please take a moment to fill in the following Comments Section, copying or removing this page from the publication and attaching additional pages if necessary. Please return it to:

# Table of Contents

CHAPTER 1	The Navy Mission .....	1-1
	History of the IR Program .....	1-2
	SMART Community Involvement .....	1-3
	SMART Cleanup Awards .....	1-7
	SMART Partnerships .....	1-10
CHAPTER 2	SMART Cleanup Goals, Policies, Programs, and Workgroups .....	2-1
	SMART Cleanup Goals .....	2-2
	BRAC Environmental Program .....	2-3
	Navy’s Restoration Process .....	2-10
	SMART Policies .....	2-13
	SMART Programs and Organizations .....	2-14
	SMART Workgroups .....	2-17
	Navy Organization Charts .....	2-18
CHAPTER 3	Making Smart Cleanup Happen .....	3-1
	SMART Training .....	3-2
	SMART Technical Documents .....	3-4
	SMART Contracting .....	3-5
	SMART Technologies .....	3-6
	SMART Cleanup Success Stories .....	3-10
CHAPTER 4	Funding Program and Status .....	4-1
CHAPTER 5	Installation Summaries .....	5-1
APPENDICES	i Introduction to Appendices & Acronym List for Appendices A and B ... Appendix-i	
	A Installation Totals Status .....	A-1
	B Status Totals .....	B-1
	C Installations with Assessment Complete and No Sites Identified .....	C-1
	D Installations with All Response Actions Completed .....	D-1
	E Information Repositories .....	E-1
	F Regulation Summary .....	F-1
INDICES	1 By Engineering Field Division/ Activity .....	Index 1-1
	2 Installations for Inclusion on the NPL .....	Index 2-2
	3 By BRAC Listing .....	Index 3-1
	4 By Installation (alphabetical) .....	Index 4-1

# Goals

## **The goals of the Environmental Restoration Program:**

- Comply fully with federal, state, and local requirements
- Act immediately to eliminate human exposure to contamination that poses an imminent threat, including removing or containing the contamination
- Across the nation, first clean up sites posing the greatest risk to human health and the environment
- Develop partnerships with EPA, state, and local regulatory agencies
- Involve the local community through Restoration Advisory Boards. Encourage participation with timely information and opportunities for public comment, and take all comments into account when making decisions
- Expedite the cleanup process and demonstrate a commitment to action
- Consider current, planned and future land use when developing cleanup strategies
